

Udacity

This guide will help you sign up for online courses that are hosted on Udacity. After completing this, you will have a learner profile and be registered as a student in this course. While you'll be working with your peers to get through the materials, many of these courses also have active and supportive online communities for you to engage with.

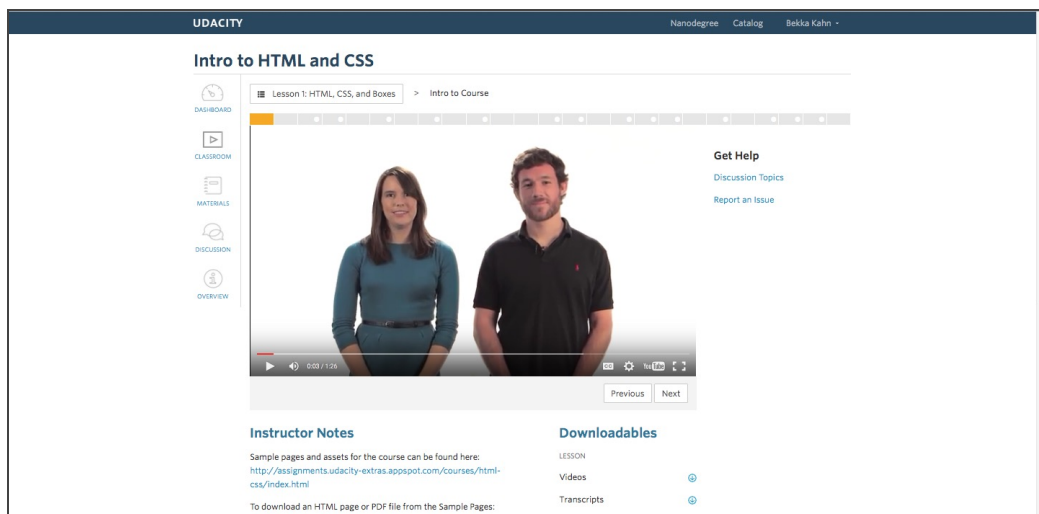

1. Navigate to www.udacity.com and click the Sign Up button on the top left-hand side. Create a username and password that you can easily remember, and be sure to use an email address that you check regularly. You might get a lot of email from these courses, but don't despair! They are really useful for keeping you motivated, and helping you throughout the course.

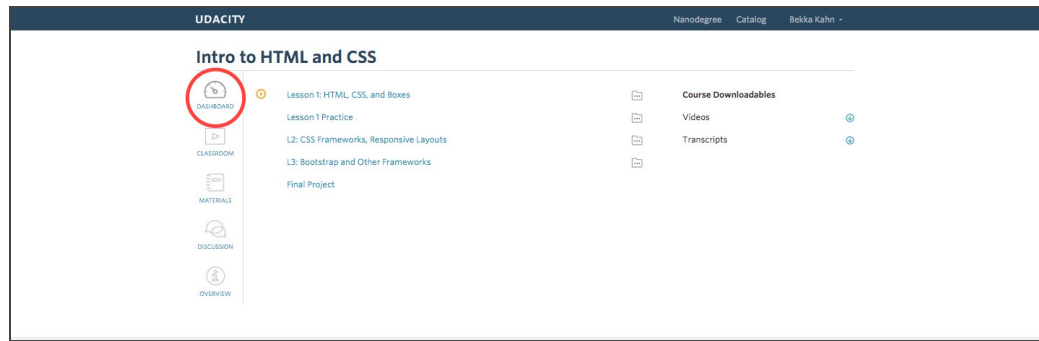

2. Once you have signed up, navigate to your course page, and click the “Start Free Course” button on the right-hand side. This will enroll you in the course.

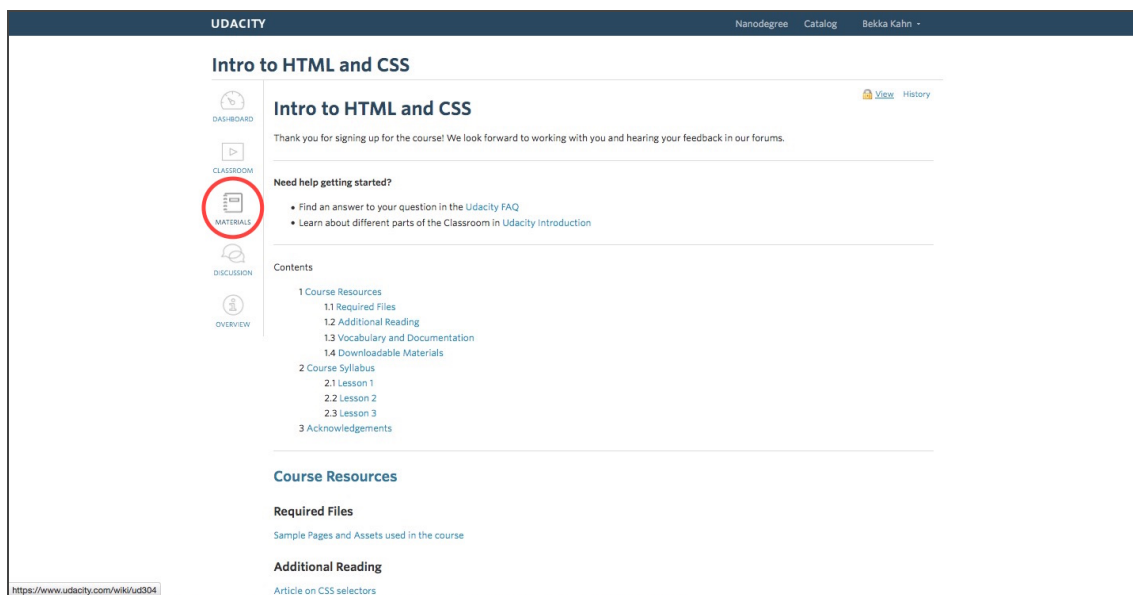

3. Once you are enrolled, you'll be taken to the first lesson in the course, which has videos and instructor notes. Headphones will be useful for learners who want to watch the videos. Down the left hand side of the screen you'll see a series of icons. Each one takes you to a different section of the course.

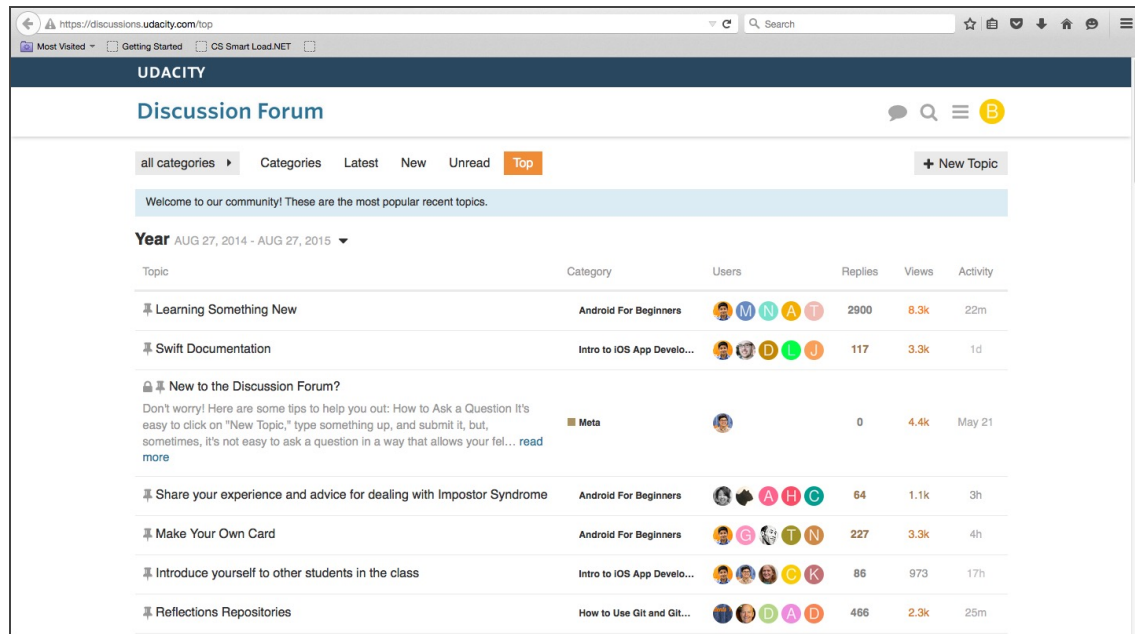

4. The Dashboard gives you an overview of the course and your progress through each module.

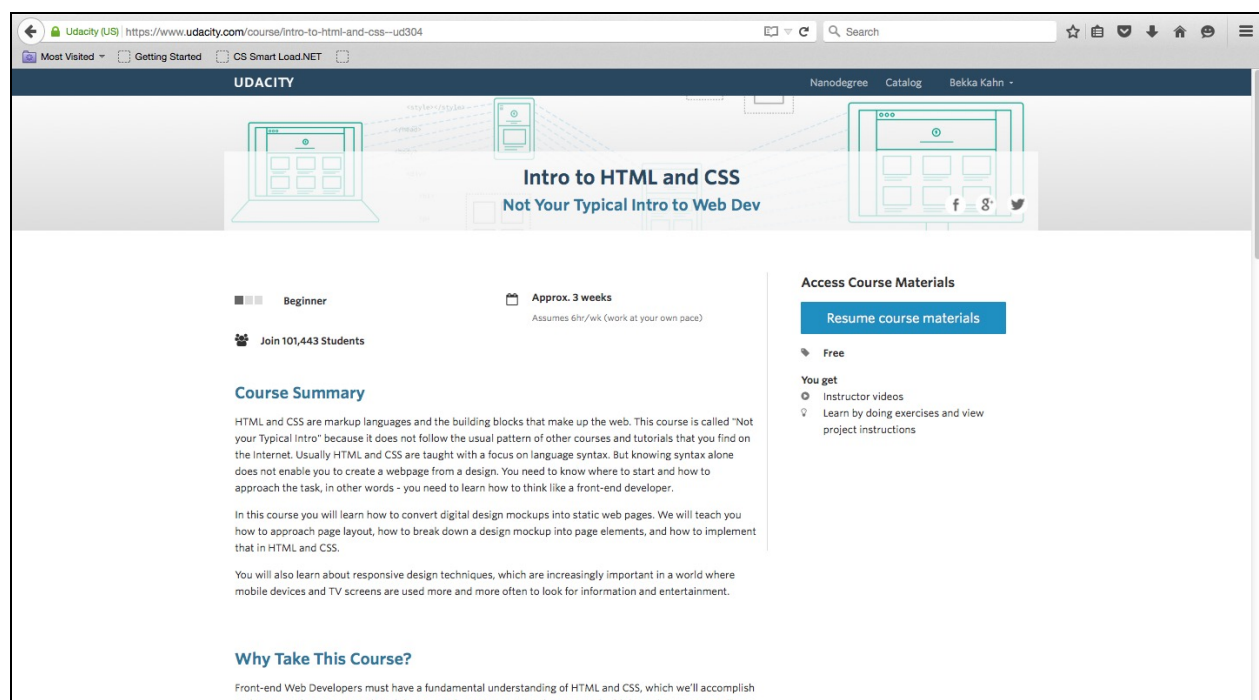

5. The Materials section is where all the readings, worksheets, videos and any other resources you'll need in the course are stored.

6. The Discussion icon will take you to a new window, a discussion forum, where you can talk with other people who have taken the course, or are busy working their way through it.

7. The Overview icon will take you to the course overview, and give you information on what you will learn in the course, what pre-requisites their might be, who the instructors are, and what the course will teach you. It's a good place to get started on familiarising yourself with the course overall.

Good luck!
