# Khan Academy

This guide will help you sign up for online courses that are hosted on Khan Academy. After completing this, you will have a learner profile and be registered as a student in this course. While you'll be working with your peers to get through the materials, many of these courses also have active and supportive online communities for you to engage with.
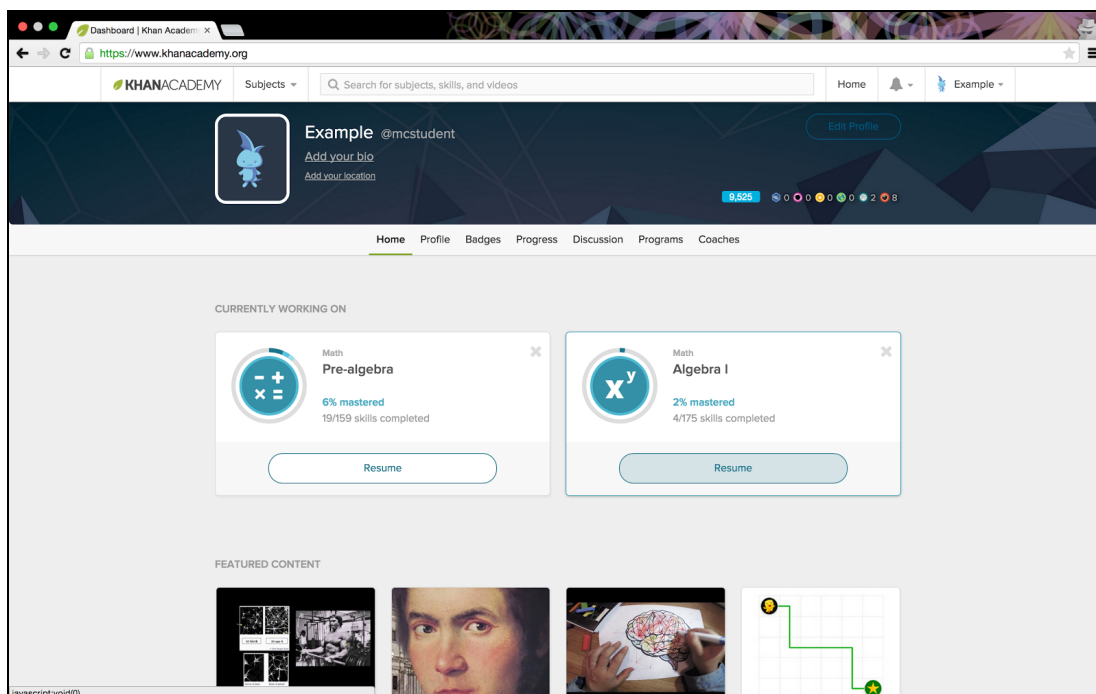

1. Navigate to https://www.khanacademy.org/

2. Login to the platform or select "Create a new account" if you don't already have one. Create a username and password that you can easily remember, and be sure to use an email address that you check regularly. You might get a lot of email from these courses, but don't despair! They are really useful for keeping you motivated, and helping you throughout the course.
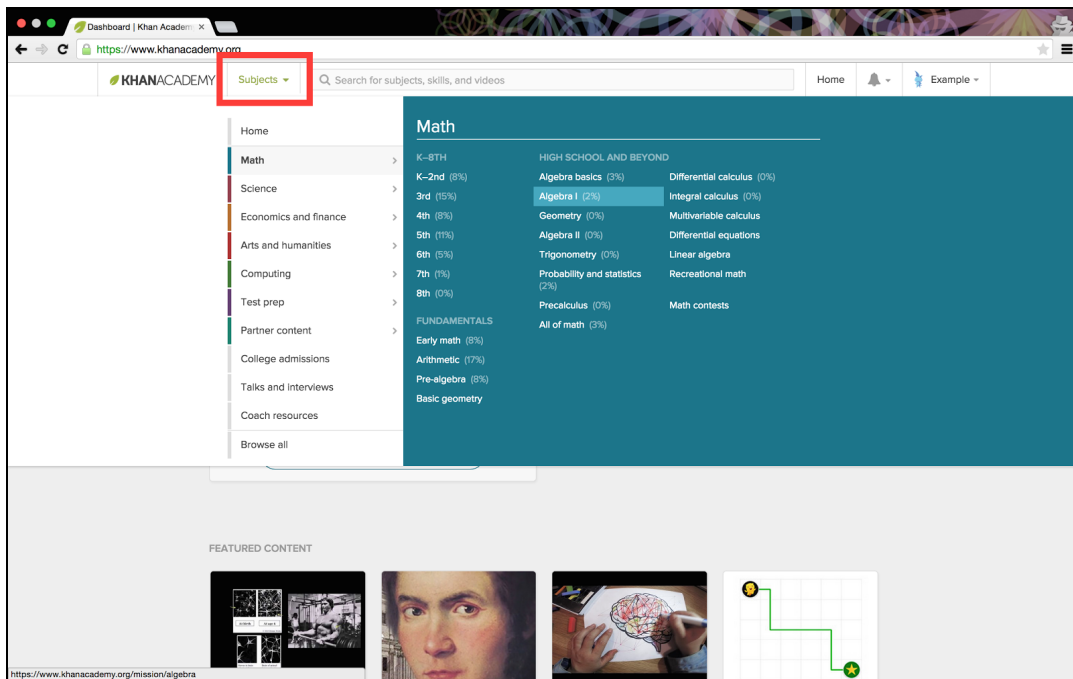

3. Once you have successfully logged in, you will be directed to your homepage, or dashboard. It should look something like this. Consider using a photo or image that you feel represents you in your profile. It is often easier to engage with people online if you can see something that represents them, and makes them unique.

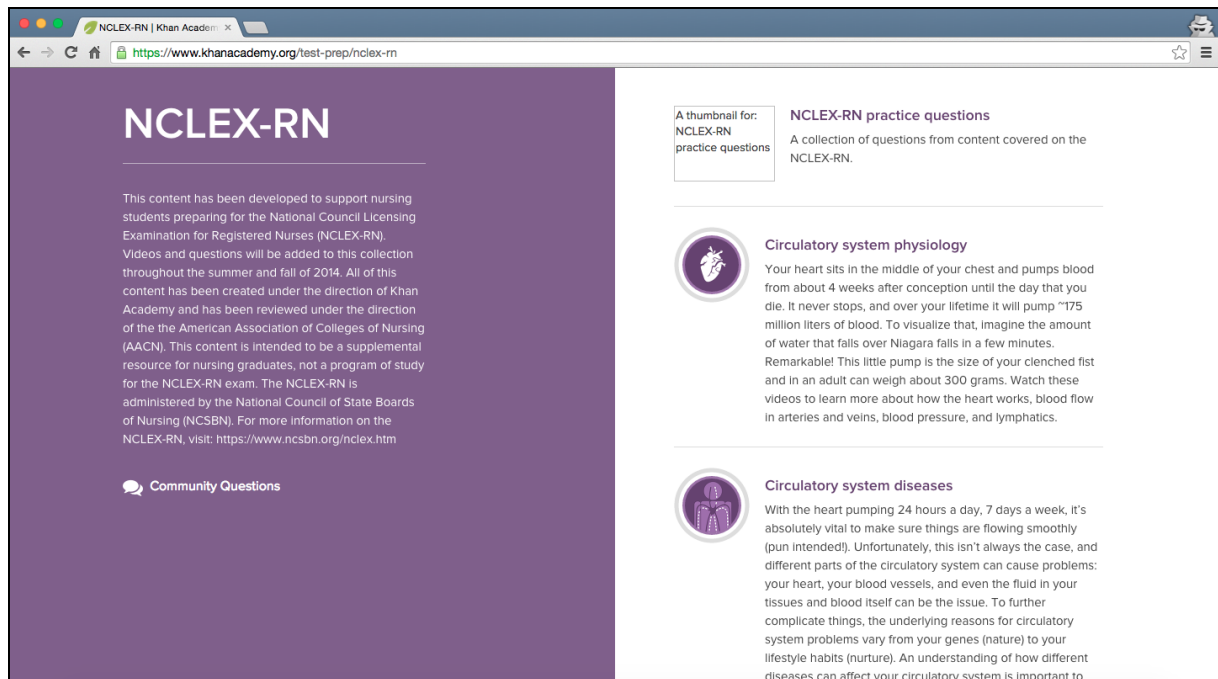

4. In the "Currently Working On" section located in the middle of the page, you will see the missions that you are currently learning. To add a new mission, select a new subject from
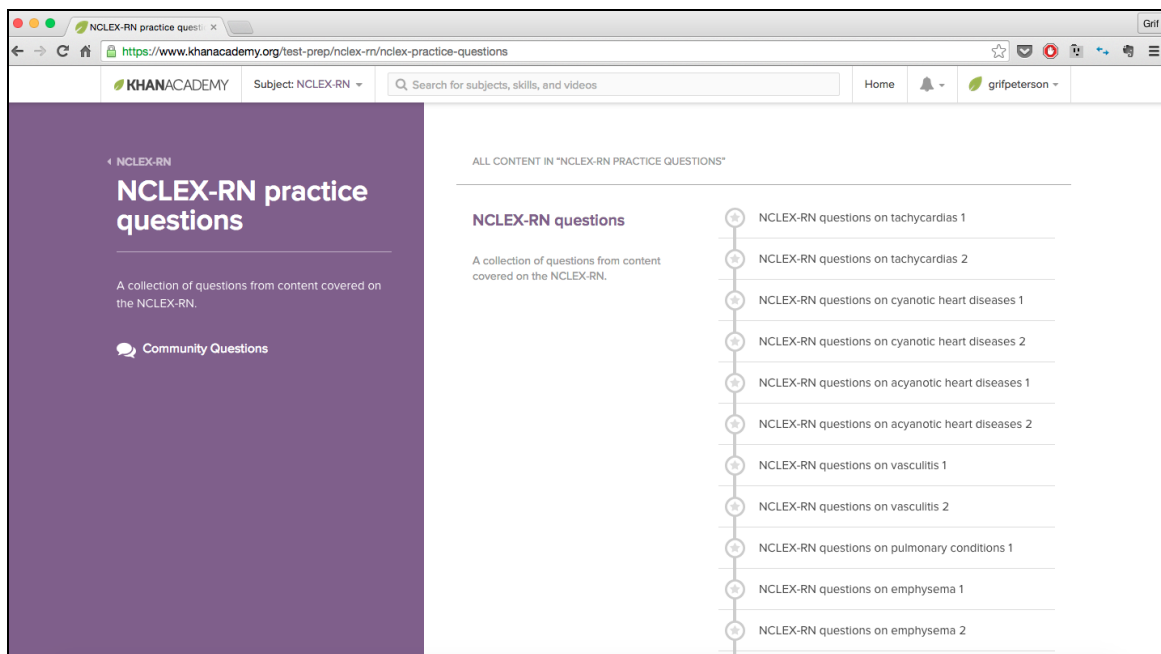

the "Subject" button in the main navigation bar and navigate to your course materials (such as "Test Prep → NCLEX-RN").

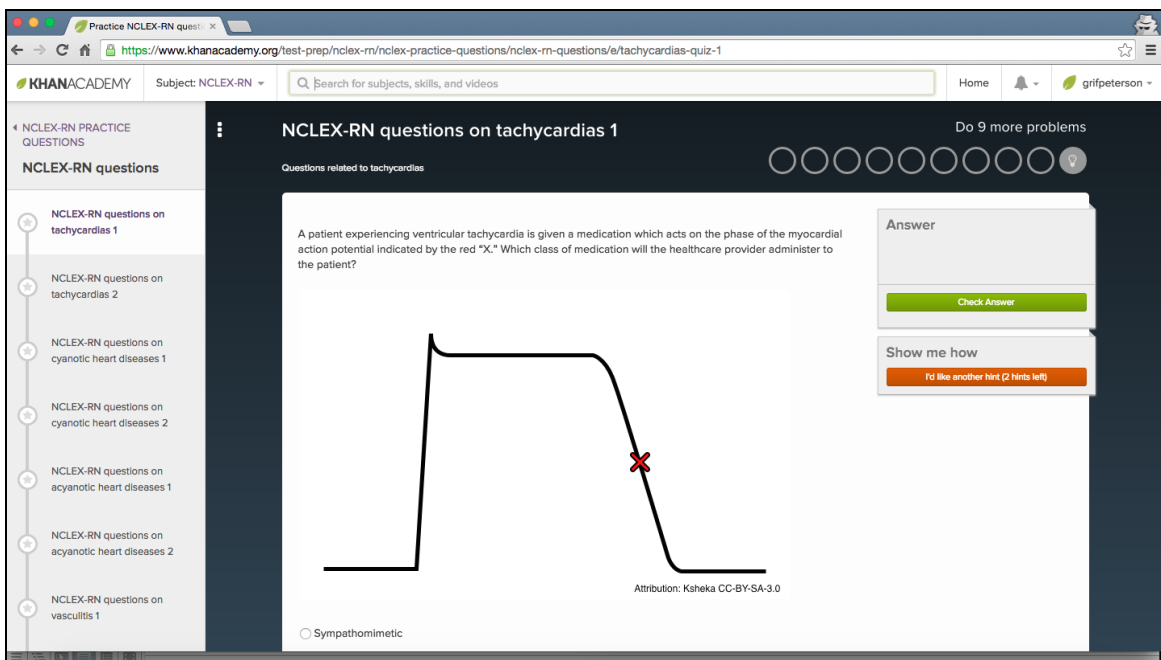

5. On the course homepage, you'll see a list of practice questions, followed by study guides for a number of different topics.
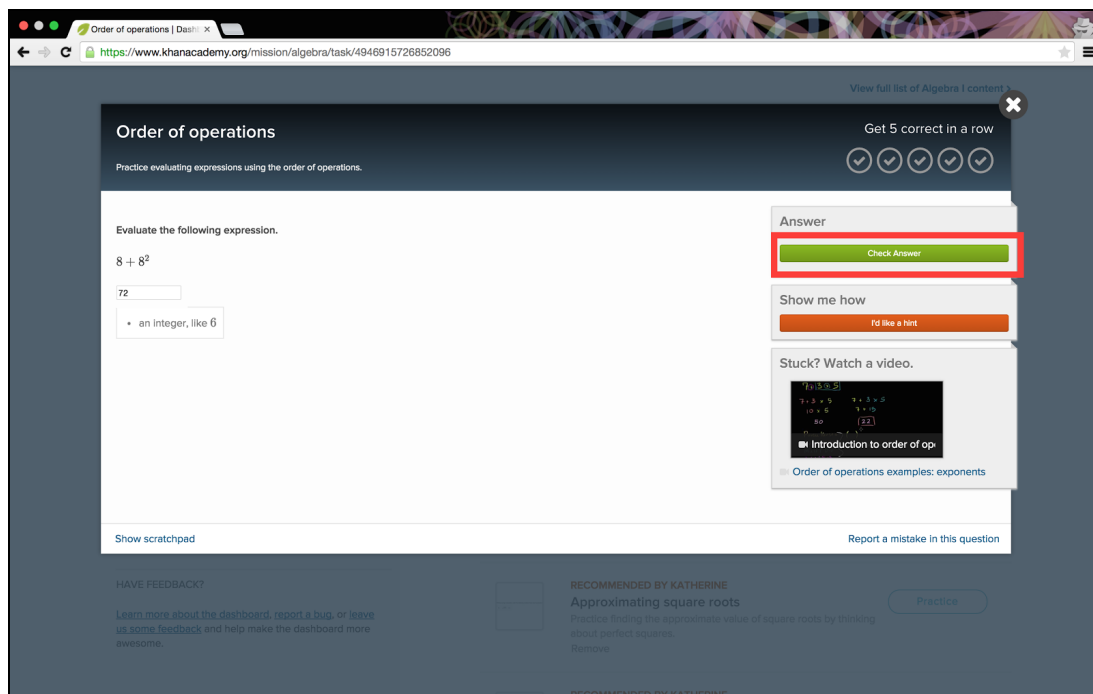

6. You can click on the practice questions to begin taking quizzes in various subjects.

7. You will then be directed to a set of practice problems associated with that skill. Attempt the problem to the best of your ability. If you get stuck, you can use the "I'd like a hint" feature to get some help. It will look like this:

8. When you want to submit an answer to the problem, type it into the answer box and choose the "Check Answer" button.

9. You will then get immediate feedback on your answer. If you get it right, you can move on to the next question. If you get it wrong, keep trying! And remember there are hints to help you.

10. In addition to the quizzes, there are hours and hours of instructional video available from the course homepage arranged in a number of different topics.

Good luck!
